

**Possible questions from Congressman Kurt Shrader (D-OR-1)**  
**U.S. House of Representatives Committee on Energy & Commerce**  
**July 13, 2016**

- Is EPA just low-balling the costs of its Proposed Plan for Portland Harbor cleanup?
- Did EPA do an economic analysis/cost-benefit analysis on its Proposed Plan?
- If people aren't eating a whole lot of fish out of the river now, and after your plan is complete in seven years people still won't be able to eat a lot of fish, what benefit to the communities and businesses in the area will this cleanup actually provide?
